

Web Design

Last Updated Friday, 15 June 2007

A customized web site design that reflects the personality and unique qualities of your business is vital in the success of a website as a promotional tool. SCR Online works closely with our clients to design, publish, and promote a site that is both functional as well meets your budget and business goals. Custom graphics, multimedia, and other web elements can be produced based on your requirements.

Rarely do we use pre-made templates as we feel that they do not reflect the personality of the individual business. It is important that your business stands out as unique and it is our goal to help make you stand out above the rest.

We pride ourselves in being highly flexible so that you feel you are getting services that fit within your budget. Contact us to set up an appointment to discuss your project and what we can do for you. Hourly Rate for hosted customers: \$40/hr. Hourly Rate for non-hosted customers: \$50/hr.

Maintaining your website after it is completed is just as important as the building of the site. You may want to keep an updated News and Announcements of what your company is doing and promoting, add the latest product or offer articles and information for you customers and visitors. There are no limits to what you can do. We can help you come up with a list of goals for your site and work towards it as your time and budget allow. Keeping your website fresh, interesting and informative is a sure way to keep your visitors coming back and keep them buying!

Maintenance for hosted customers: \$35/hr.

Paid with monthly hosting. Left over time rolls over to next month - 15 min. minimum

For examples of our work and access to happy customers, see our design portfolio gallery below.
