

Hosting: Email Administration

Can I control my own mail accounts on the domain(s) I host with WebNexus/SCR?

Certainly. We may need to setup an account for you to be able to do so. If this is something you are interested in doing, please don't hesitate to contact us to set this up, it takes just a few minutes. Once you have the account set up, go to: <https://mail.scronline.com/pfadmin/login.php> Log in with your username and password and manage any accounts and aliases you have for your domain on our mail servers.
