

Web Mail: Logging on

Last Updated Tuesday, 19 June 2007

How do I logon to the web based mail client?

On the navigation to your left or top, click "Web Mail". The next page is the logon page. Enter your full email address for your username and your password. For example:

username: yourname@scronline.com

password: <yourpassword>You may then be asked to perform maintenance. You may skip this if you wish by clicking the skip button. However it does help keep your web mail account cleaner so you may wish to let it do the maintenance. It only takes a few seconds.
