

ISP: Web Mail

How can I access my email when I'm away from my computer?

WebNexus/SCR Has a webbased email client available. You can access it by going to <http://www.scronline.com> and clicking the link on the left labeled "Web Mail". You will be prompted for a username and password. Your username is your complete email address.

The webbased email will allow you to access any email that is still on our server and has not yet been picked up by your computer. The emails will remain there until you check your mail from your computer normally or you delete it.
