

Re-sellers

Last Updated Friday, 15 June 2007

WebNexus provides reseller accounts for web designers and startup internet service providers. These accounts are billed at a lower rate than retail costs. The fees will remain constant with each service from the date it is started with WebNexus. Prices may change from time to time that can not be altered due to overhead costs but each account can be addressed at the resellers request as costs change for each type of service and billing adjusted accordingly. There are many options available for hosting and internet service resellers. WebNexus has other options available such as Managed Hosting, Colocation, and Equipment sales that are available. Contact us to find out about what services may be best for you or your clients and accurate pricing at the time.
